VIREN CHAUHAN

Software Developer | Full-Stack Development | Applied AI | AI Product Development

(404) 574-0556 • chauhan.viren08@gmail.com • http://virenchauhan.com • Atlanta, GA, United States

Game Design student at Savannah College of Art and Design pursuing a minor in Applied AI, with hands-on experience building and deploying full-stack applications, AI-powered products, and interactive software using JavaScript, Python, Firebase, C++, and C#. Built products used by real users and recently placed 3rd globally at the AI Tinkerers Agents, Everywhere Hackathon with OpenAI for developing ScreenMate.

Education

Savannah College of Art and Design | B.F.A. Game Design, Minor in Applied AI | Expected May'2028 | Atlanta, GA
Student-Athlete, SCAD Cross Country & Track | Coursework: Programming, Applied AI, UX/UI, Game Design

Awards & Recognition

3rd Place Globally | AI Tinkerers Agents, Everywhere Hackathon with OpenAI | September 2026
Placed 3rd out of 687 completed projects across 50 cities worldwide for ScreenMate, becoming the only U.S.-based finalist in the global top three. Built with OpenRouter and Exa.

Projects

ScreenMate | Founder & Software Developer
Full-Stack Web Application | OpenRouter | Exa API | LLM Integration
Built an AI browser agent that understands page context, researches relevant information, and helps users complete tasks and forms more efficiently.
Integrated OpenRouter for LLM-powered reasoning and Exa API for AI-driven web search and information retrieval.
Designed human-in-the-loop workflows that require user approval before sensitive actions or decisions.
Designed and implemented the product interface, application logic, AI integrations, and end-to-end user experience.
Currently exploring enterprise applications including intelligent recruiting and ATS candidate-to-role matching based on skills, experience, and job requirements.

La Ultra | Full-Stack Software Developer
Web Application, Firebase, Applied AI
Designed and built a deployed clinical web application for a practicing physician, growing the platform to 134 registered users.
Developed patient-management and progress-tracking workflows while creating personalized digital experiences through application logic and AI-assisted functionality.
Built administrative functionality and user-facing interfaces while managing application data and iterating on features based on real-world use.

SCADhome Employee Management Platform | Full-Stack Developer
Web Application, JavaScript, UX/UI
Developed a workforce-management web application designed to simplify employee scheduling and common workplace workflows.
Built functionality for employee accounts, clock-in and clock-out, shift-change requests, approvals, and administrative announcements.
Designed the system around clear employee and administrator workflows while debugging and refining interactions for reliability and ease of use.

Experience

SCADpro x Atlanta United FC | UX/UI Lead | January 2026- March 2026
Led UX/UI development for a multidisciplinary SCADpro collaboration with Atlanta United FC, working across design, technology, and client teams under NDA.
Collaborated through iterative critiques and stakeholder feedback to prototype and refine interactive experiences while communicating design decisions across disciplines.

FIFA World Cup 2026 | Anti-Doping Team Volunteer | May 2026- July 2026
Selected as one of four Anti-Doping Team volunteers for the FIFA World Cup 2026, supporting confidential athlete testing logistics, controlled-area procedures, compliance operations, and detail-sensitive coordination.

SCAD Student Athlete Advisory Committee | Chief Finance Officer | Sept'25-June'26
Managed finance-related responsibilities and supported student-athlete initiatives, event planning, and campus communication.

Technical Skills

Programming: JavaScript, Python, C++, C#, HTML, CSS
Web Development: Firebase, REST APIs, Authentication, CRUD Applications, Responsive Web Development
AI Development: OpenRouter, Exa API, LLM Integration, AI API Integration, Generative AI, Prompt Engineering
Development Tools: Git, GitHub, Visual Studio
Game Development: Unreal Engine 5, Unity, Blueprints
Design & Product: Figma, UX/UI Design, Rapid Prototyping, Adobe Creative Suite
